## Document Purpose

This synthetic company document is designed for testing enterprise retrieval, grounded question answering, cross-document comparison, citation mapping, and evaluation workflows in NexusIQ.

## 1. Scope and Reimbursement Principles

This Travel and Expense Reimbursement Policy applies to approved business travel, client visits, conference attendance, field work, recruiting events, and other work-related expenses for ApexFlow Technologies employees.

- Expenses must have a clear business purpose and must be reasonable for the travel location.
- Employees must submit receipts within 10 business days after the expense date.
- Expenses without receipts may be rejected unless an exception is approved by Finance.
- Manager approval is required before booking travel that exceeds standard limits.

## 2. Travel Booking Rules

Employees should use the approved travel booking portal whenever possible. Economy class is required for flights under 6 hours. Premium economy may be approved for flights longer than 6 hours when the trip includes same-day customer meetings or executive presentations.

| Expense Category     | Standard Limit                  | Approval Rule                                                |
|----------------------|---------------------------------|--------------------------------------------------------------|
| Domestic Flight      | Economy fare                    | Manager approval required before booking.                    |
| International Flight | Economy fare by default         | Director approval required for premium economy.              |
| Hotel                | \$220 per night                 | Manager approval required if nightly rate exceeds the limit. |
| Meals                | \$75 per day                    | Receipts required for individual meals above \$25.           |
| Ground Transport     | Reasonable ride-share or rental | Rental cars require manager approval before booking.         |

## 3. Reimbursable and Non-Reimbursable Expenses

ApexFlow reimburses business expenses that are necessary, documented, and approved. The company does not reimburse personal entertainment, family travel, traffic fines, minibar charges, personal subscriptions, or expenses that violate customer or vendor gift policies.

- Reimbursable: airfare, hotel, meals, ride-share, conference registration, parking, customer meeting materials, and approved equipment transport.
- Non-reimbursable: personal travel upgrades, movies, alcohol without client-event approval, parking tickets, lost personal items, and expenses submitted more than 45 days late without Finance exception.

- Mixed personal and business travel must clearly separate business expenses from personal expenses.

## 4. Expense Submission Workflow

Employees submit reimbursement requests in the ApexFlow Expense Portal. Requests are routed first to the direct manager and then to Finance. Finance may return the request for clarification, missing receipts, incorrect cost center, or policy violations.

| Step | Owner          | Action                                                                                           |
|------|----------------|--------------------------------------------------------------------------------------------------|
| 1    | Employee       | Upload receipts, select cost center, write business purpose, and submit within 10 business days. |
| 2    | Direct Manager | Approve business purpose and confirm the expense supports team work.                             |
| 3    | Finance        | Validate receipts, policy limits, tax rules, and payment details.                                |
| 4    | Payroll/AP     | Process reimbursement in the next scheduled payment cycle.                                       |

Manager approval is required for hotel rates above \$220 per night, rental cars, international travel, conference attendance above \$1,500, and any exception to the standard reimbursement limits.

## 5. Late, Missing, or Exceptional Expenses

Expenses submitted after 45 days require Finance exception approval. Missing receipts require a signed expense attestation. Exceptions above \$500 require both manager and Finance approval. Exceptions above \$2,000 require director approval.

## 6. Audit and Compliance

Finance performs quarterly expense audits. Employees may be asked to provide additional business justification for selected expense reports. Repeated submission of non-compliant expenses may result in reimbursement delays, manager review, or People Operations escalation.
